

# School Management System

Group#07

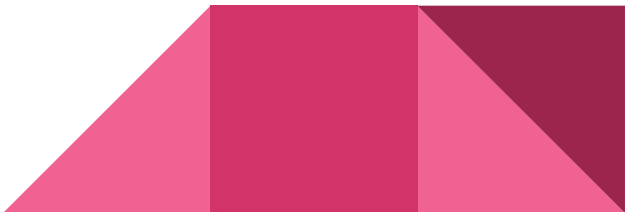

Joel Barkey, Dmitriy Tarasov, Souneth Ly

# About the Project

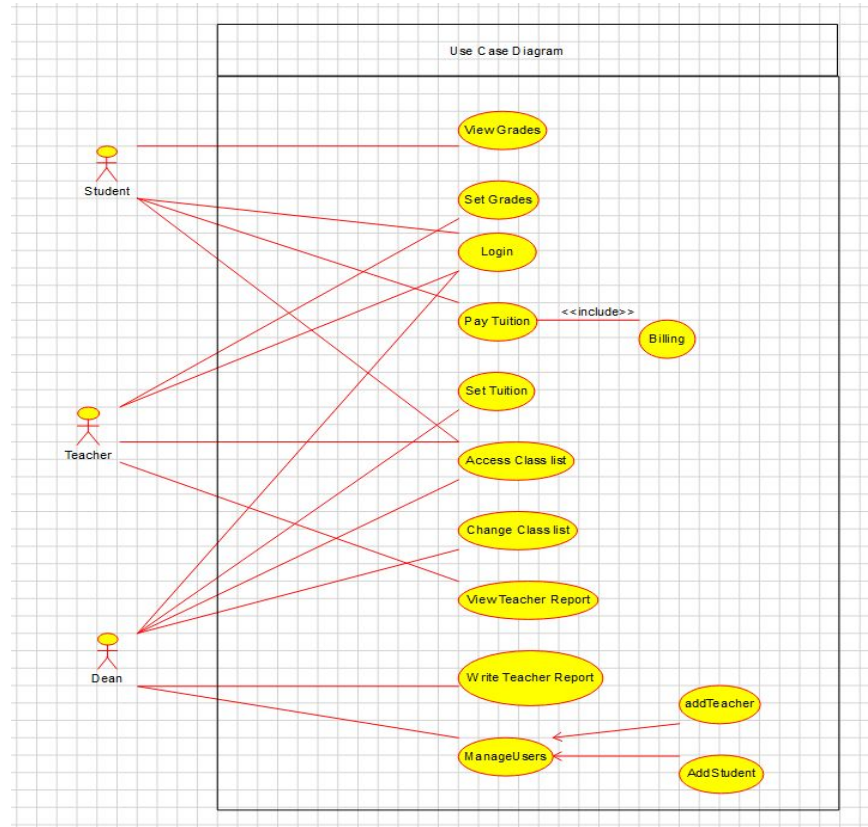

**Description:** A school management system that keep tracks of Students, their grades, and their class schedules. Teachers should be able to access this information for their specific students, and can modify grades for their class only.

## Functionality:

- Users can login
  - Student can see grades
  - Teacher can set grades (for their class only)
  - Teacher can see performance reviews
  - Dean can write performance review
  - Dean can set tuition bill
-

# Class Diagram

# Improvement in the future

- add better security
- implement classes that students take
- change tuition to be based on classes a student has
- grades for each class
- more complex relational database
- lots of display improvement
